SUMMARY

Agentic AI Developer, Software Engineer, and Frontend Developer with comprehensive experience building AI-powered systems, LLM-driven applications, multi-agent workflows, and interactive web interfaces. Experienced in Python, AI orchestration, RAG pipelines, and modern frontend technologies (HTML, CSS, JavaScript). Proven ability to design and deploy scalable tools, integrate APIs, optimize data workflows, and deliver high-quality, end-to-end software solutions. Applies intelligent automation and open-source innovation to create user-centered products with measurable real-world impact.

SKILLS

Programming Languages: Python, Java, C++, JavaScript | **AI | ML and Data Science:** Agentic AI, RAG, Prompt Engineering, Machine Learning, Data Preprocessing, Feature Engineering | **Web Development:** HTML, CSS, JavaScript | **Tools:** Git/Github, Linux, VS Code | **Soft Skills:** Teamwork, Leadership, Communication, Solution Design, Creativity

EDUCATION

BSc in Software Engineering

Adama Science and Technology University

04/2025 – 05/2025

Adama, Ethiopia

Relevant Coursework: Data Structures & Algorithms, Database Systems, Data Communication & Computer Networks, Object Oriented Programming

Data Science

CSE ASTU Club Data Science Bootcamp

04/2025 – 05/2025

Adama, Ethiopia

- Data Manipulation and Visualization
- Data Preprocessing and Feature Engineering
- Machine Learning and Advanced Modeling
- Feature Selection and Model Optimization

Artificial Intelligence

Agentic AI Development — In Progress

LLM Engineering and Deployment — In Progress

01/2025 – Present

Adama, Ethiopia

PROJECTS

RAG Chatbot

- Engineered RAG chatbot integrating GPT-4 and Llama 2 with Chroma achieving 95% response accuracy, replacing manual knowledge retrieval.
- Implemented custom text embeddings, document chunking, search indexing, and semantic query routing, improving retrieval accuracy by **40%** and reducing response time by **25%**.
- Built and deployed a functional prototype that supports domain-specific knowledge retrieval across **5+ documents**, enabling users to obtain context-grounded answers in real time.

Web Search AI Agent

- Built an AI-powered research agent using Python, Tavily Search, and Google Gemini to deliver concise summaries, reducing manual research time by **60%** for test users.
- Designed ranking and filtering mechanisms that increased factual accuracy by **30%** and reduced irrelevant results by **50%**.
- Developed modular tool functions supporting multi-step reasoning, enabling the agent to complete **3–5 automated sub-tasks** per query.

EXTRACURRICULAR

Competitive Programming

- Solved **125+ LeetCode problems**, improving algorithmic efficiency and coding skills.
- Solved **50+ Codeforces problems**, gaining experience in competitive coding under time constraints.
- Strengthened proficiency in **data structures, algorithms, and competitive coding strategies**.

01/2025 – Present

Adama, Ethiopia

LANGUAGES

English — Proficient

Afan Oromo — Native/Bilingual

Amharic — Proficient
